Web-Based Management of Your Traffic Data and Documents

Miovision's Online Traffic Data Management solution replaces desktop software, databases and spreadsheets, and filing cabinets with an online system that manages all your data, documents, and related files in one centralized location.

Scalable and Accessible. Keep all your data and documents organized and securely accessible from any computer.

Create Reports Automatically. Create preformatted, industry-standard reports from any dataset - and then email it to whoever needs it (e.g. project manager, client, government agency, etc.).

Share Your Data & Documents. Associate all your documents, data, pictures, etc. with locations on a map. Then set sharing permissions to

allow your clients to get the data they need whenever they want, conveniently online.

Miovision's online solution can significantly reduce the amount of time you spend on data management. Best of all, it integrates with other Miovision solutions for an end-to-end traffic data solution.

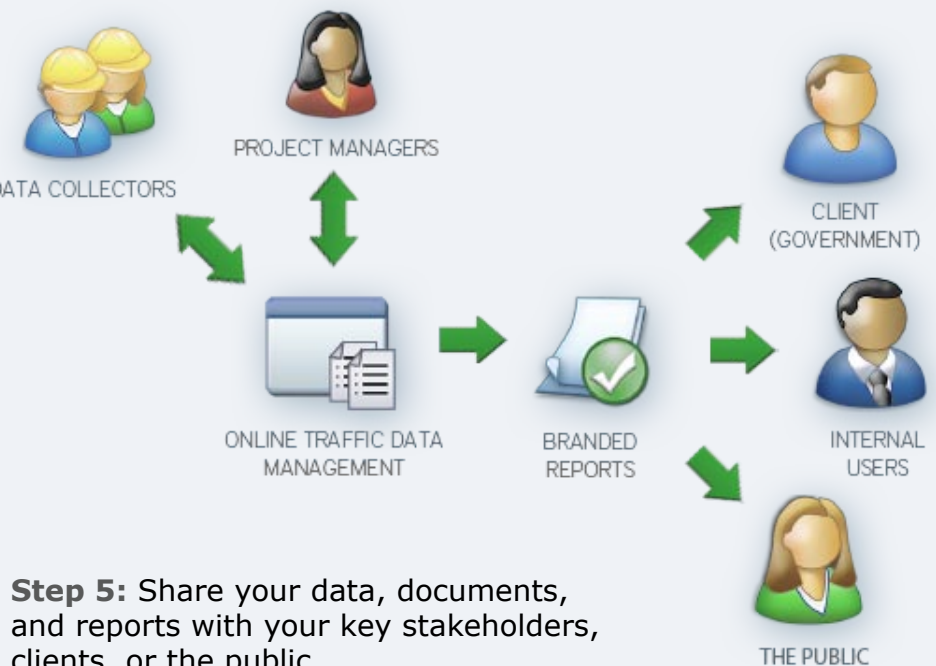

An Efficient Online System

Step 1: Collect your traffic data. Consider using Miovision's Automated Video Traffic Studies solution to do this more accurately and cost-effectively.

Step 2: Upload your data directly from your hardware into the web portal.

Step 3: Project Managers can compile, merge, and edit datasets for maximum accuracy.

Step 4: Create branded reports using your logo and preformatted industry-standard templates.

Step 5: Share your data, documents, and reports with your key stakeholders, clients, or the public.

Easy-to-Use Features & Interface

Adding, Editing and Sharing Data & Documents

- Add counts from hardware-based collection devices (e.g. JAMAR boards);
- Add counts from almost any file format (e.g. .csv, .jcd, .trf, .ppd) located on your computer;
- Merge datasets easily and quickly;
- Upload video and analyze using Miovision's Video Analytics software;
- Upload and manage documents, pictures, and any other file type;
- Edit datasets easily using a built-in spreadsheet editor;
- Associate datasets and other documents with geographic locations;
- Use the Scheduling module to manage your counts on both a weekly and daily basis for maximum resource use.

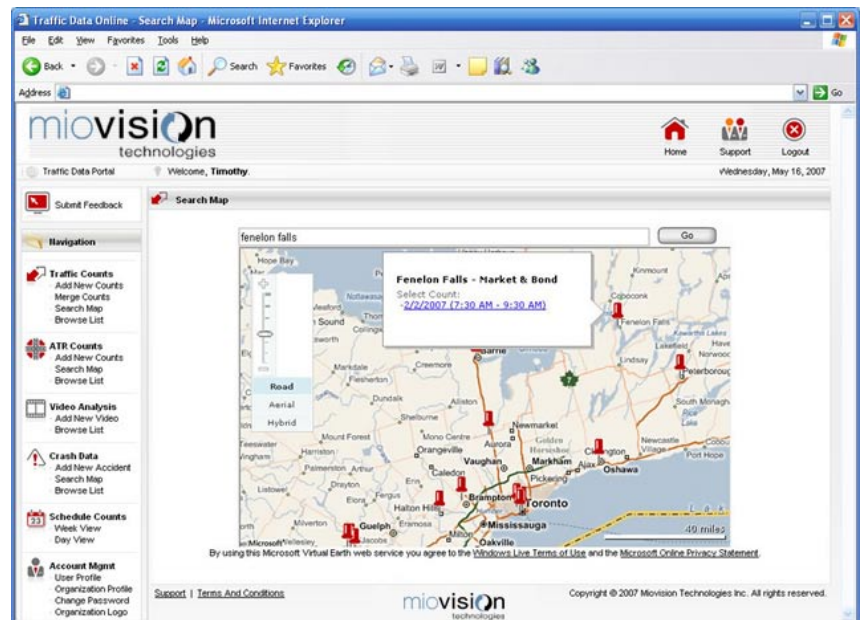

Exporting and Reporting the Data

- Export data to Excel, CSV, PDF, PetraPro, or a pre-formatted industry report;
- Create industry-standard reports easily and quickly;
- Automatically send reports to clients, coworkers, or whoever else you define;
- Customize your reports with your company's logo and tagline, as well as other components.

Browse and Search Data & Documents

- Browse all your datasets at a glance;
- Built-in search functionality allows you to find the data you are looking for quickly;
- Search for datasets by address, coordinates, or by a variety of other search criteria;
- Add metadata to index your studies, making them easier to identify and find;
- Share your data with third-parties (e.g. clients, other agencies, the public) with the Organizational Sharing module;
- Find all documents for a particular geographic area with only two clicks after login.
